Group

## Defence

## Risk Acceptance Criteria

# Defence Sector

We recognise that the activities of our customers can have environmental, social and ethical (ESE) impacts – including polluting activities and the potential for human rights infringements. ESE risk forms part of NatWest Group’s overall Reputational Risk Policy and requires enhanced due diligence to be performed for certain customer relationships, transactions, activities and projects. To manage these risks, we have developed Risk Acceptance Criteria for sectors which present heightened ESE risk and define the level of ESE risk the bank is prepared to accept.

## Scope

The ESE Risk Framework applies to all legal entities within the Group for the onboarding of non-personal customers (including, but not limited to, for the purposes of providing lending or loan underwriting services).

## Context

As a purpose-led bank we champion potential, helping people, families and businesses to thrive.

We recognise the right of nations to protect their people and property. The UK defence sector supports that objective, whilst also providing employment opportunities for many local communities. At NatWest Group, we are proud of our long association of support for the UK armed forces. We also recognise the potential for weapons to be used to cause harm and suffering and that some weapon types can cause mass, indiscriminate and long-lasting damage.

NatWest Group acts in accordance with the strict regulation and licensing arrangements set by the UK government, and by relevant international standards, when engaging with companies involved in the design, manufacture, support and trade of defence equipment. Our support for Nuclear Weapons manufacturers extends to customers incorporated in NATO countries which are officially involved in and accredited to the national nuclear weapons programmes of only UK, US or France.

Defence Transactions must be supported by a government licence and although essential, this alone is not sufficient. When making case by case decisions whether to facilitate defence transactions, we consider the product type, jurisdiction and end use of the product, and do not support transactions going to jurisdictions that have a track record of human rights abuse, or where the country’s adherence to international standards in the conduct of military action undermines confidence in the end use of the weapon.

We do not support customers involved in the manufacture, sale, trade, servicing or stockpiling of Highly Controversial Weapons, and bespoke components of such weapons, banned under international agreements ratified by the UK. This includes cluster munitions, anti-personnel landmines, biological and toxin weapons, chemical weapons and Blinding Laser Weapons.

This document summarises our ESE Risk Acceptance Criteria for the Defence sector.

## Prohibited

- Financing of companies involved in the manufacture, sale, trade, service or stockpiling Highly Controversial Weapons banned under International Agreements ratified by the United Kingdom (Cluster Munitions, Anti-Personnel Landmines, Biological and Toxin Weapons, Chemical Weapons and Blinding Laser Weapons) and the manufacture or sale of Bespoke Components of such weapons.
- Financing of companies involved in the manufacture, sale, trade, servicing or stockpiling of nuclear weapons in jurisdictions outside NATO countries and that are not officially involved in and accredited to the national nuclear weapons programmes of the UK, US or France.
- Financing of companies involved in the manufacture, sale or trade of defence goods where there is no (defence related) licence in place, and such is required.
- Use of child labour, forced labour, modern slavery or human trafficking.

## Restricted

- Financing of companies involved in the manufacture, sale, trade, servicing or stockpiling of nuclear weapons and the manufacture or sale of Bespoke Components in NATO countries and are officially involved in and accredited to the national nuclear weapons programmes of only UK, US or France.
- Companies involved in the manufacture, trade or sale of Semi or Fully-autonomous Armed Unmanned Aerial Vehicles and Depleted Uranium Weapons.
- Manufacture, sale and trade of all other Weaponry (e.g. bombs, missiles, rockets, guns, ammunition) and equipment designed to enable the transport, deployment, execution or performance of a weapon (e.g. aircraft carriers, weapon platforms) where weapons are manufactured or sold in high-risk countries.
- Non-manufacturing companies (arms traders) involved in the sale or procurement of defence-related equipment.
- Issues identified during the ESE risk assessment that give cause for ESE/reputational risk concern e.g. material or repeat non-compliance with environmental and social laws, a lack of adequate policies and procedures for managing ESE risks or major targeted non-governmental organisation campaigns against a company.

## Normal

- None of the above apply and no material issues have been identified during the ESE risk assessment.
